

Evaporator cleaner & disinfectant kills the bacteria and microbes, and addresses concerns over indoor air quality. The disinfectant ensures total hygiene leaving the unit safe and clean.

for evaporators

Universal coil cleaner for use on both air cooled evaporators and condensers. This product attacks the dirt and not the coil. It provides effective cleaning as part of regular maintenance.

general purpose

Acrylic protective coating for coils is an effective, preventative measure to avoid corrosion on coils. An indicator dye ensures complete coverage. In a rapid-drying no mess formula. Easy-to-use aerosol.

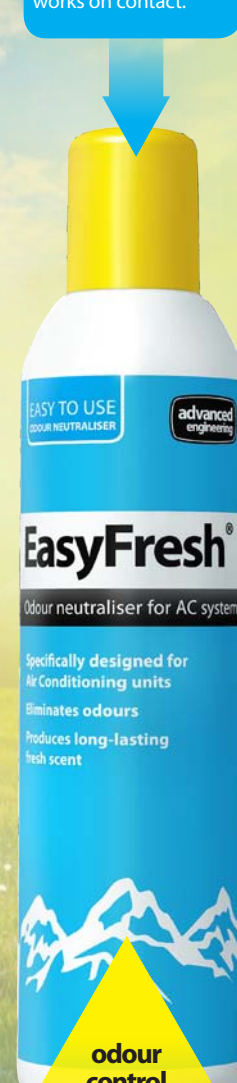

protection for coils

Bubble-up leak detector is specifically designed for locating refrigerant leaks. It produces long-lasting bubbles that will cling to all surfaces. Leaks will bubble-up and appear quickly.

leak detection

Odour neutraliser for AC systems is specifically designed for use with air conditioning units. It eliminates odours as well as producing a long-lasting fresh scent. This product works on contact.

odour control

Heavy duty condenser cleaner has a deep foaming action that is ideal for removing stubborn dirt from condensers. It improves system efficiency and is able to target dirt deep within problem coils.

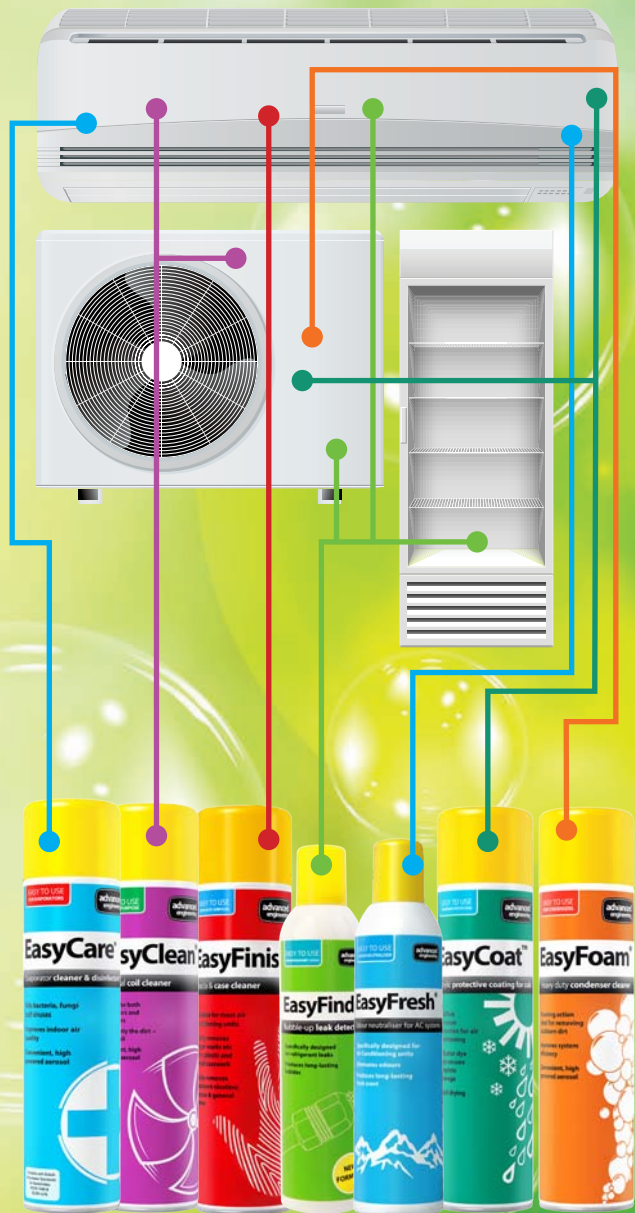

for condensers

Fascia and case cleaner is suitable for most air conditioning units, and easily removes grease, and general grime from plastic and metal casework. EasyFinish™ is also good for use on nicotine stains.

case cleaner
